¹ **Net Asset Value (NAV)** is total assets less total liabilities divided by the number of shares outstanding. **Market Price**, determined by supply and demand, is the price an investor purchases or sells the fund. The Market Price may differ from a fund's NAV.

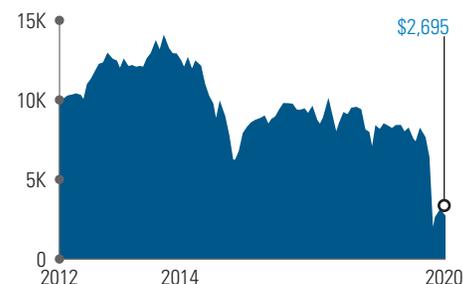

² Distribution rate is calculated by annualizing the most recent distribution amount paid, excluding special distributions, divided by the closing market price or NAV. As of 5/31/2020, the fund estimates that the distributions will be paid from: 0.00% investment income; 0.00% realized capital gains; and, 100.00% return of capital. The Distribution Rate is subject to change and is not a quotation of Fund performance. The Board of Directors may terminate or suspend the managed distribution policy at any time. Any such termination or suspension could have an adverse effect on the market price of the Fund's shares. A return of capital is not taxable and results in a reduction in the tax basis of a shareholder's investment. For more information about a distribution's composition refer to the Fund's distribution press release or, if applicable, the Section 19 notice located in the press release section of our website.

³ The difference between total assets and net assets, if any, is due primarily to the Fund's use of borrowings and other liabilities; net assets do not include borrowings. The Fund may employ leverage in the form of loans, preferred stock, reverse repurchase agreements and/or other instruments. When the Fund engages in transactions that have a leveraging effect on the Fund's portfolio, the value of the Fund will be more volatile and all other risks will tend to be compounded.

The Closed-End Funds are not sold or distributed by Legg Mason Investor Services, LLC ("LMIS") or any affiliate of Legg Mason, Inc. Unlike open-end funds, shares are not continually offered. Like other public companies, closed-end funds have a one-time initial public offering, and once their shares are first issued, are generally bought and sold through non-affiliated broker/dealers and trade on nationally recognized stock exchanges. Share prices will fluctuate with market conditions and, at the time of sale, may be worth more or less than your original investment. Shares of exchange-traded closed-end funds may trade at a discount or premium to their original offering price, and often trade at a discount to their net asset value. Investment return, market price and net asset value will fluctuate with changes in market conditions. The Funds are subject to investment risks, including the possible loss of principal invested.

What should I know before investing?

All investments are subject to risks, including the possible loss of principal. Investments in MLP securities are subject to unique risks. The Fund's concentration of investments in energy related MLPs and midstream entities subject it to the risks of MLPs, midstream entities and the energy sector, including the risks of declines in energy and commodity prices, decreases in energy demand, adverse weather conditions, natural or other disasters, changes in government regulation, and changes in tax laws. Leverage may result in greater volatility of NAV and the market price of common shares and increases a shareholder's risk of loss. The Fund may invest in small capitalization or illiquid securities which can increase the risk and volatility of the Fund. The Fund may make significant investments in derivative instruments. Derivative instruments can be illiquid, may disproportionately increase losses, and have a potentially large impact on Fund performance.

MLP cash distributions are generally tax deferred. Non-cash expenses, such as depreciation or depletion, usually offset income derived from an MLP's operations. To the extent that these expenses exceed income, cash distributions are considered return of capital under tax law. As such, they are not taxed when received. Instead, the distribution, in the form of return of capital, reduces a unit holder's cost basis. This adjusted cost basis, in turn, results in a higher capital gain or lower capital loss when the units are sold. Of course, there can be no assurances that distributions from an MLP will be tax deferred. The Fund will be treated as a regular corporation for U.S. federal income tax purposes and, as a result, unlike most investment companies, is subject to corporate income tax to the extent the Fund recognizes taxable income. Any taxes paid by the Fund will reduce the amount available to pay distributions to investors, and therefore investors in the Fund will likely receive lower distributions than if they invested directly in MLPs or midstream entities.
