Risk and Reward Profile

Investment risks

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator: **Bonds:** There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation. **Liquidity:** In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments. **Low rated bonds:** The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds. **Emerging markets investment:** The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries. **Asset-backed securities:** The timing and size of the cash-flow from asset-backed securities is not fully assured and could result in loss for the fund. These types of investments may also be difficult for the fund to sell quickly. **Fund currency:** Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it. **Interest rates:** Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall. **Derivatives:** The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested. **Fund counterparties:** The fund may suffer losses if the parties that it trades with cannot meet their financial obligations. **Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries. **Charges from capital:** Fees and expenses of this share class may be charged to the capital of the share class rather than its income. This policy will result in an increase in income available for distribution to investors. However, this will forego some of the capital that the share class has available for future investment and potential growth. For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Definitions

Life The average number of years for which each component of unpaid principal on a bond, loan or mortgage remains outstanding. The weighted average life calculation provides an aggregate figure that shows how many years it will take to pay off half the outstanding principal on a bond portfolio.

Effective duration Average Duration equals the weighted average maturity of all the cash flows in the portfolio and gives an indication of the sensitivity of a portfolio's bond prices to a change in interest rates. The higher the duration, the more sensitive the portfolio is to interest rate changes. Effective Duration is a calculation for bonds with embedded options (Not every portfolio will purchase bonds with embedded options). It takes into account the expected change in cash flows caused by the option, as interest rates change. If a portfolio does not hold bonds with embedded options, then the Effective Duration will be equal to the Average Duration.

Credit quality breakdown Nationally Recognised Statistical Rating Organisation's (NRSRO's) assess the likelihood of bond issuers defaulting on a bond's coupon and principal payments. The weighted average credit quality by Brandywine Global Investment Management assigns each security the middle rating from three NRSRO's (Standard & Poor's, Moody's Investor Services and Fitch Ratings, Ltd.). In the event that only two NRSRO's provide ratings, the lowest of the two ratings will be assigned. If only one NRSRO assigns a rating, that rating will be used. All securities have ratings from at least one NRSRO. The lower the overall credit rating, the riskier the portfolio. The credit rating is expressed as a regular letter rating (from high to low quality): AAA, AA, A, BBB, BB, ...D.

Distribution yield The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the Net Asset Value of the class as at the reported date. It is based on a snapshot of the portfolio on that day. It does not include any subscription charges and investors may be subject to tax on distributions.

Important Information

OUTSIDE OF THE UNITED KINGDOM, IRELAND AND SWITZERLAND, THIS FACTSHEET IS FOR USE BY PROFESSIONAL OR QUALIFIED INVESTORS ONLY.

This is a sub-fund ("fund") of Legg Mason Global Funds plc ("LMGF plc"), an umbrella fund with segregated liability between sub-funds, established as an open-ended investment company with variable capital, organised as an undertaking for collective investment in transferable securities ("UCITS") under the laws of Ireland as a public limited company pursuant to the Irish Companies Acts and UCITS regulations. LMGF plc is authorised in Ireland by the Central Bank of Ireland (the "Central Bank"). It should be noted that the value of investments and the income from them may go down as well as up. Investing in a sub-fund involves investment risks, including the possible loss of the amount invested. Past performance is not a reliable indicator of future results. An investment in a sub-fund should not constitute a substantial proportion of an investor's investment portfolio and may not be appropriate for all investors. Investors' attention is drawn to the specific risk factors set out in a fund's share class key investor information document ("KIID") and LMGF plc's prospectus (the "Prospectus"). This material is not necessarily a complete summary and is not intended, for example, as a complete analysis. The information and data in this material (that may include without limitation research, forecasts, figures, opinions, statements, trends, investment techniques and strategies) has been prepared from sources believed reliable but is not guaranteed in any way by Legg Mason Investments (Europe) Limited nor any Legg Mason, Inc. company or affiliate (together "Legg Mason"). No representation is made that the information or data is correct as of any time subsequent to its date. Further there is no guarantee or assurance that funds will achieve their investment objectives. Individual securities mentioned are intended as examples only and are not to be taken as advice nor are they intended as a recommendation to buy or sell any investment or interest. Before investing investors should read in their entirety LMGF plc's application form and a fund's share class KIID and the Prospectus (which describe the investment objective and risk factors in full). These and other relevant documents may be obtained free of charge in English, French, German, Greek, Italian, Norwegian and Spanish from LMGF plc's registered office at Riverside Two, Sir John Rogerson's Quay, Grand Canal Dock, Dublin 2, Ireland, from LMGF plc's administrator, BNY Mellon Fund Services (Ireland) Limited, at the same address or from www.leggmasonglobal.com.
