**Past performance is not a reliable indicator of future results.** Source for performance figures - Legg Mason. Performance is calculated on a NAV to NAV basis, with gross income reinvested without initial charges but reflecting annual management fees. Sales charges, taxes and other locally applied costs to be paid by an investor have not been deducted. Performance is calculated using estimated dividends, and is revised (downward or upward) when the actual dividend differs from the estimated dividend. Revised performance returns may not be available until the next reporting period. Comparisons to relevant indexes and peer groups are included as a standard against which the performance of a fund can be measured. Returns of the indexes and peer groups do not reflect any fees, expenses or sales charges. An investor cannot invest directly in an index or peer group.

This Fund was created from the contribution of all the assets of the no longer existing Martin Currie Emerging Markets Fund established on 09/09/91, a Fund with a substantially similar investment objective and policy. Past performance was calculated using historical performance data of [the Martin Currie Emerging Markets Fund] and it may not be a reliable indicator of the Fund's future performance. The performance data should be used for illustrative purposes only, as performance prior to the Fund's inception date has not been adjusted to reflect the fees of the Fund. As at Fund inception, the Fund's fixed annual expenses for the share class shown above (investment management fees, custody and administration fees and shareholder servicing fees) were around 2.10% in comparison to the predecessor Fund of 2.11% – there may be other variable costs not included in these figures.

For purposes of performance measurement, the first day of the relevant measurement period may differ for the fund and the benchmark, due to different holiday schedules.

Class A Acc.

## Investment manager

**Martin Currie** has a long history dating back to 1881. The firm is a specialist in active international equities, with investment capabilities across global equities, global emerging markets, Asian equities and European equities delivered through 60 investment professionals who are supported by an independent risk-management function.

## Investment risks

**The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:**

**Investment in company shares:** The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

**Emerging markets investment:** The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

**Investment in smaller company shares:** The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

**Concentrated fund:** The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

**Fund currency:** Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

**Derivatives:** The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

**Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

**Please refer to the Key Investor Information and Prospectus documentation, which describe the full objective and risk factors associated with this Fund.**

## Definitions

**IA Sector Peer Group:** The ACD considers that the Investment Association (IA) Sectors provide an appropriate comparison for performance purposes given the fund's investment objective and policy. Please refer to the Prospectus for further information.

**SRRI / Risk and reward profile:** There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund. The lowest category does not mean a risk-free investment. The fund does not offer any capital guarantee or protection.

**Country allocation table:** Country allocation is reported by country of listing as opposed to country of exposure. As such, certain instruments offering indirect exposure to sectors and geographies e.g. P-notes, ETFs and other access products may show under countries outside the stated investment strategy. However the actual market exposure is fully in line with the stated investment strategy. Further information can be requested from the manager on this at any time.
